What Is Adderall 30mg?

Adderall 30mg is a **CNS (Central Nervous System) stimulant** that contains two active ingredients — **Amphetamine and Dextroamphetamine**. These compounds work together to improve focus, attention span, and impulse control in individuals diagnosed with **Attention Deficit Hyperactivity Disorder (ADHD)**. It's also prescribed to help manage **narcolepsy**, a condition characterized by excessive daytime sleepiness.

Uses & Benefits

When taken as prescribed, **Adderall 30mg** helps:

- Increase concentration and alertness
- Reduce restlessness in ADHD patients
- Improve wakefulness for narcoleptic users

- Support better productivity and focus throughout the day

Many adults and students rely on this medication to manage ADHD symptoms effectively and lead balanced, active lives.
