What Is Tramadol 100mg (Generic Name & Uses)

Tramadol, known by its generic name Tramadol Hydrochloride, is a prescription-strength analgesic designed to relieve moderate to moderately severe pain. It works by acting on the central nervous system (CNS) to alter the way your body perceives and responds to pain. Patients often use it for post-surgical pain, nerve pain, or arthritis-related discomfort, making it one of the most reliable pain management options available.
